Disposal of Needles

Place used needles in a closeable, puncture-resistant container. You may use a sharps container (such as a red biohazard container), a hard plastic container (such as a detergent bottle), or a metal container (such as an empty coffee can). Ask your healthcare provider for instructions on the right way to throw away (dispose of) your used pens and the container. There may be state and local laws about how you should throw away used pens and needles. Do not throw the disposal container in the household trash. Do not recycle. For additional information you may contact the Coalition for Safe Community Needle Disposal at 800-643-1643 or www.safeneedledisposal.org.

How do I throw away my needles?

- It's important to remove the needle immediately after each injection.
- Throw away used needles in a puncture-resistant container or as recommended by your healthcare provider. For proper needle disposal procedures in your state, visit www.safeneedledisposal.org.
- Do not throw away the pen with a needle attached.

Be sure to read the [User Manual](#) that comes with your BYETTA Pen for more complete instructions.
